The **SAT** Suite of Assessments

The SAT® Suite of Assessments is an integrated system of tests that includes the SAT (for students in grades 11 and 12), the PSAT/NMSQT® and the PSAT™ 10 (for grades 10 and 11), and the PSAT™ 8/9 (for grades 8 and 9).

The tests measure the same skills and knowledge in gradeappropriate ways. They work together to show college readiness over time so educators, students, and parents can monitor student progress. Their content reflects the kinds of meaningful, engaging, and challenging work that students find in the best middle school and high school courses taught today.

The SAT, the last test in the suite, is a globally recognized college admission test that's accepted at all U.S. colleges.

What the SAT Measures

The SAT measures the skills and knowledge that research shows are the most important for success in college and career. It includes the following sections.

EVIDENCE-BASED READING AND WRITING

This section is made up of a Reading Test and a Writing and Language Test, each composed of multiparagraph passages and multiple-choice questions.

The Reading Test measures comprehension and reasoning skills and focuses on close reading of passages in a wide array of subject areas. The Writing and Language Test measures a range of skills including command of evidence, expression of ideas, and the use of standard English conventions in grammar and punctuation.

MATH

This section includes multiple-choice and studentproduced response questions. It assesses skills in algebra, problem solving and data analysis, manipulation of complex equations, geometry, and trigonometry.

ESSAY (OPTIONAL)

The SAT Essay asks students to read a high-quality source text and write an effective analysis of that text using evidence drawn from the source. It measures a range of skills in reading, analysis, and writing.

How the SAT Is Scored

Students receive a total score that is the sum of their scores on the two sections (Evidence-Based Reading and Writing and Math). The optional SAT Essay is scored separately.

To calculate section scores, we first compute the student's raw score—the number of questions correctly answered—for each section. Nothing is deducted for incorrect answers or for unanswered questions.

Next, we convert each of the raw section scores to a scaled score of 200 to 800. This conversion process adjusts for slight differences in difficulty among versions of the test and provides a score that is consistent across different versions. The scaled scores are the scores provided on score reports.

How You Can Use the Student Score Report

The student score report clearly summarizes a student's current achievement levels and encourages next steps to increase college and career readiness. You can help students by going over their score reports and helping them understand what their scores mean. Here's how.

TALK ABOUT COLLEGE READINESS WITH STUDENTS

For each section, the score report includes an indicator that shows whether the student's score meets the college readiness benchmark.

- If the student is meeting the benchmark for a section, explain that this means they're right on track to be ready for college when they graduate from high school.
- If the student isn't meeting the benchmark for a section, encourage them to strengthen their skills in that area.

USE STUDENT SCORES TO IDENTIFY STRENGTHS AND WEAKNESSES

- Use the test scores, cross-test scores, and subscores to evaluate the student's relative strengths and weaknesses and see what skills need practice.
- Use the red/yellow/green coding on test scores and subscores to see how the student is performing relative to other students who are meeting or exceeding the benchmark. Prioritize areas in the red range for additional work and practice.

HELP STUDENTS DECIDE ON NEXT STEPS

- Work with students to think of ways to develop each of the skills you've identified for focus and improvement.
- Encourage students to go online for more details about their scores and to link their College Board account to Khan Academy® for a personalized study plan.

For further guidance on interpreting score reports, see the Professional Development modules for K–12 educators at **sat.org/educators**.

How You Can Use the K-12 Score Reporting Portal

The online reporting portal at **k12reports.collegeboard.org** offers you an array of powerful tools to assess your students' progress and plan instruction that delivers what they need. The tools include:

- Flexible reports that can be sorted and filtered by key demographics.
- Instructional planning support using test subscores in specific content areas, benchmarks, information for cross-subject tasks, and data for prescribing interventions when students are behind or ahead.

SAT Scores

Total Scores

The total score is the sum of the two section scores; its range is 400–1600.

Section Scores

Your students receive scores in the range of 200–800 for each of two sections. The Evidence-Based Reading and Writing section score combines the scores for the Reading Test and the Writing and Language Test. The Math section score is derived from the Math Test score, including the calculator and no-calculator portions.

Test Scores

The range for the following test scores is 10-40:

- Reading
- Writing and Language
- Math

Cross-Test Scores

The range for cross-test scores is also 10–40. These scores represent performance on select questions across the three tests and show a student's strengths in the following domains:

- Analysis in History/Social Studies
- Analysis in Science

Subscores

Subscores in the range of 1–15 offer feedback on student performance in the following skill areas:

- Command of Evidence
- Words in Context
- Expression of Ideas
- Standard English Conventions
- Heart of Algebra
- Problem Solving and Data Analysis
- Passport to Advanced Math

SAT Essay Scores

The following three scores for the optional SAT Essay are on a 2–8 scale:

- Reading
- Analysis
- Writing

These scores aren't added together or combined with any other test scores. The online score report shows the prompt the student responded to and the student's essay.

Score Ranges

A student's ability is better represented by score ranges than points. Score ranges are derived from the standard error of measurement and show how much a student's scores would likely vary if they took a different administration of the test under identical conditions.

Score ranges:

- Total: ±40 points
- Section: ±30 points
- Test scores, subscores, and cross-test scores: ±2 points

Benchmarks

The SAT College and Career Readiness Benchmarks reflect benchmark scores for each SAT section. Students whose scores meet both the Evidence-Based Reading and Writing and Math benchmarks are considered college and career ready.

Benchmarks Help You Guide Students

Color-coded indicators in the student score report show whether the student meets the benchmark, is approaching the benchmark, or needs to strengthen skills. You can use this information to decide on next steps as you work with the student. For example, you can use the benchmarks to guide the student to take courses that will challenge them, based on their progress thus far, and to practice the skills that matter the most for college.

Benchmarks shouldn't be used to assign academic tracks, to discourage students from pursuing college, or to keep students from enrolling in challenging courses. Rather, the benchmarks are intended to help all students better prepare for life after high school.

What the Benchmarks Mean

The College and Career Readiness Benchmarks for the current SAT predict a 75% likelihood of achieving a C or higher in related, first-semester, credit-bearing college courses. The benchmarks are set at the section level, so there is a benchmark for Evidence-Based Reading and Writing and a benchmark for Math.

SAT College and Career Readiness Benchmarks

| Evidence-Based Reading and Writing | Math |
|---------------------------------------|------|
| 480 | 530 |

Percentiles

A student's percentile rank represents the percentage of students whose score is equal to or lower than their score. For example, if a student's score is in the 75th percentile, 75% of a comparison group achieved scores at or below that student's score. Two types of percentile ranks, comparing student scores to two different reference populations, are provided in this publication for both total and section scores.

Nationally Representative Sample Percentiles are derived from a research study of U.S. students in grades 11 and 12 and are weighted to represent all U.S. students in those grades, regardless of whether they typically take the SAT.

SAT User Percentiles are based on the actual scores of students in the graduating class of 2017 who took the new SAT (first offered in March 2016) during high school. These User percentiles are reported on tests completed in August 2018 through June 2019.

Percentiles for Total Scores

Am I on Track for College?

Look for the green, yellow, or red symbols next to your section scores. They let you know if your scores are at or above the benchmark scores. Benchmarks show college readiness. If you see green, you're on track to be ready for college when you graduate.

If you score below the benchmark, you can use the feedback and tips in your online report to get back on track.

Benchmark scores:

Evidence-Based Reading and Writing: 470

How Do My Scores Compare?

A percentile shows how you scored, compared to other students. It's a number between 1 and 99 and represents the percentage of students whose scores are equal to or below yours.

For example, if your Math percentile is 57, that means 57% of test takers have Math scores equal to or below yours.

The Nationally Representative Sample Percentile compares your score to the scores of typical U.S.

SAT® User Percentile compares your score to the scores of students who typically take the test.

How Can I Improve?

To see which skills are your strongest and what you can do to boost your college readiness, go to your full report online and look for Skills Insight™.

What Are Score Ranges?

Test scores are single snapshots in time—if you took the SAT once a week for a month, your scores would vary.

That's why score ranges are better representations of your true ability. They show how much your score can change with repeated testing, even if your skill level remains the same.

Colleges know this, and they get score ranges along with scores so they can consider scores in context.

Your online score report shows your score ranges.

^{*} Scores from the SAT Subject Test in Mathematics aren't comparable to Math section, test, and related subscores on the SAT. *Not all SAT Subject TestsTM have subscores.

How Do I Send My Scores to Colleges?

This student score report is for your use only.

Most colleges require you to have the College Board send them official score reports. They don't accept copies of student score reports, online score reports, or score report labels on transcripts.

Can I Choose Which Scores to Send?

With Score Choice $^{\mathbb{N}}$, you decide which scores you send to colleges. Choose by test date for the SAT and individual test for SAT Subject Tests $^{\mathbb{N}}$. Just make sure you follow each college's stated score-use policy.

What's Next?

Go to sat.org/scorereport and choose your next steps:

- Send your scores to colleges.
- Find out which AP* courses you might do well in.
- Get tips on boosting your skills.
- Use your scores to personalize your SAT practice.
- Make a college plan.
- Follow your interests, and build a career road map.
- Register for SAT Subject Tests, or take the SAT again.
