

# A FUTURE FOR KENNEDY ELEMENTARY A PROPOSED CENTRALIZED PreK-5 ELEMENTARY

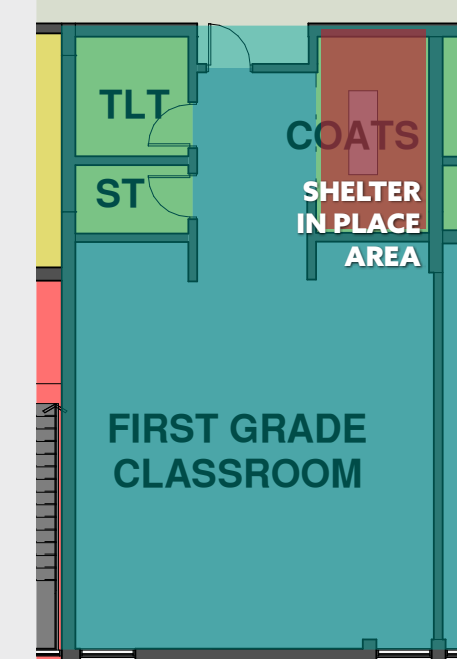

REVEAL. REFLECT.  
VISUALIZE THE FUTURE.

## MAIN FLOOR PROJECT HIGHLIGHTS

### SAFETY FIRST

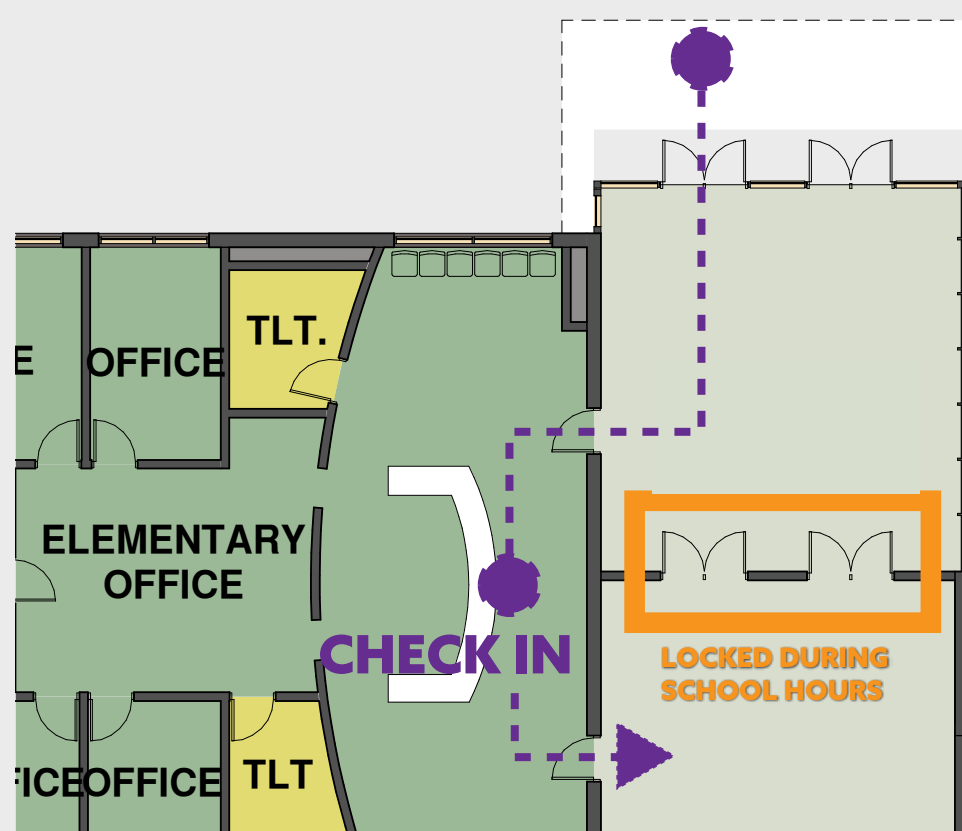

After meeting with teachers, and parents as part of the Student Safety Advisory Committee along with gathering the hundreds of responses to date on the MAPS 2020 Vision, Safety, is a top priority. That is why **shelter in place areas** are created in ALL K-5 classrooms. These areas are equipped to be safe sight line areas for teachers and students to retreat to in the event of an in-building emergency.

**ALL FIRST GRADE & KINDERGARTEN** have toilets, storage and coat room area in EACH classroom. This allows teachers to safely manage the students from inside each classroom.

Each grade wing is partitioned off by controlled doors that can be activated in the central office in the event of an emergency. These doors will close, sealing the classroom wings from the circulation areas of the building, providing an additional level of safety to students in the building. These are located on each floor, entering each classroom wing.

### SECURE ENTRY & CHECK-IN

The elementary office (off the primary parking area) will be the **ONLY ENTRY** point during school hours. The outer doors will allow entry, with a secondary door entry to the office. The office staff will check-in the visitor and allow them access if permitted.

### EARLY CHILDHOOD

During our community vision sessions, Early Childhood Education is a high priority for the community. Therefore, the district has integrated Preschool spaces into its proposed PreK-5 centralized elementary. In addition, GSRP also has a home inside of the plan.
