

AN EXPANSION FOR MIDDLE + HIGH SCHOOL A PROPOSED MIDDLE SCHOOL GYM & CAPITAL UPDATES

REVEAL. REFLECT.
VISUALIZE THE FUTURE.

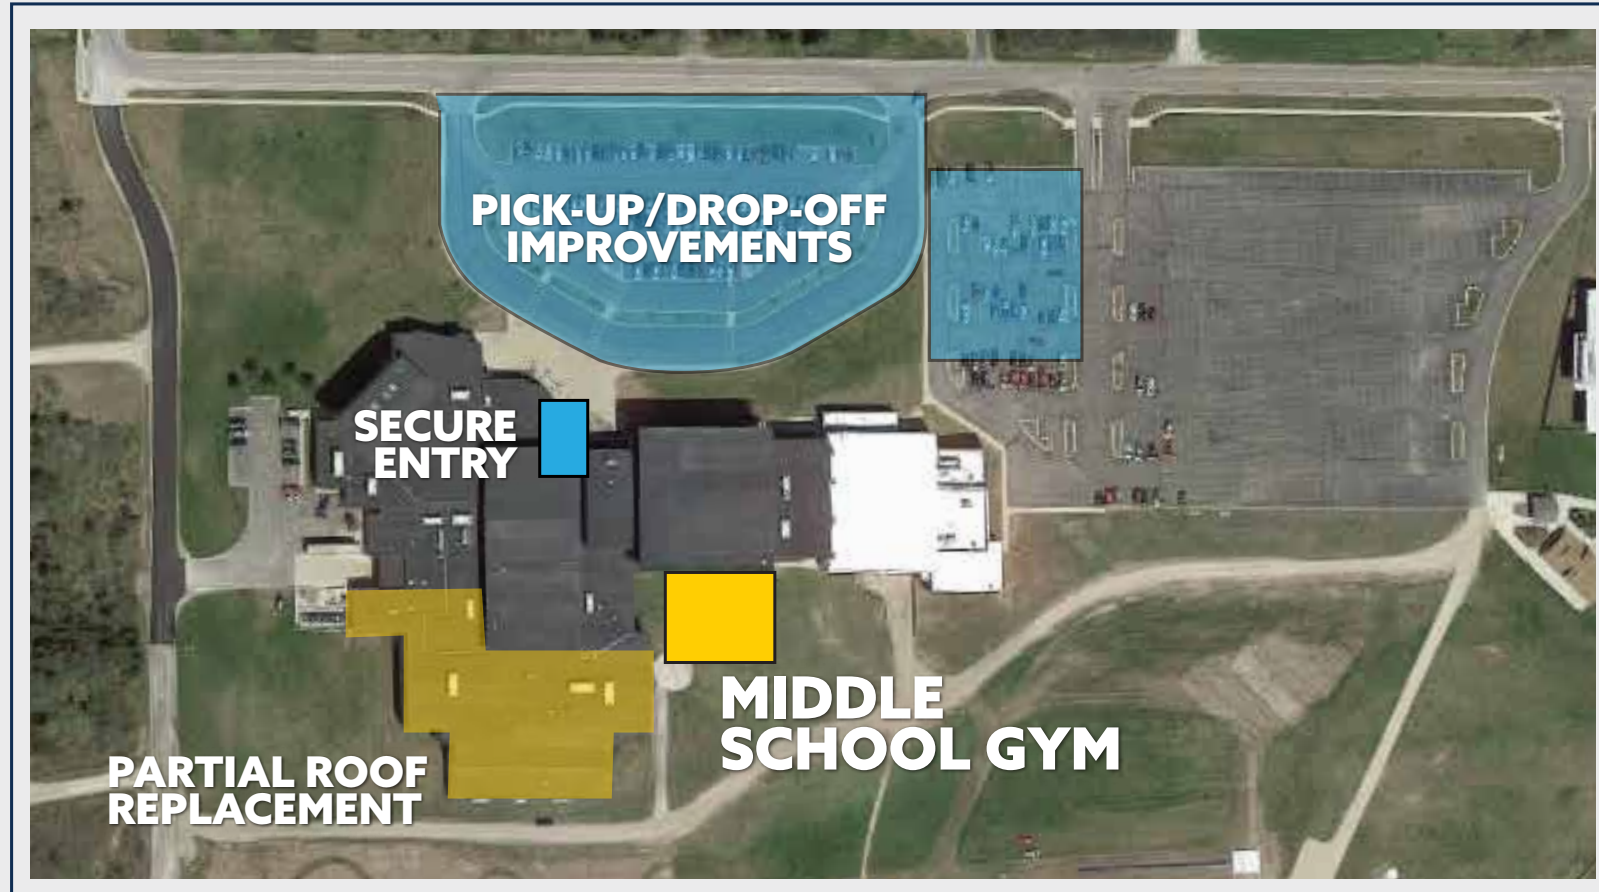

POSITION

As the district looked at its entire facility infrastructure. The Middle+High School is currently the district's newest building (completed 2003), and is home to grades 6-12. The building was originally designed as a high school only grades 9-12, but through the district's declining enrollment, it was determined to bring the entire middle school grades (6-8) to the high school site and alter the configuration accordingly.

Since bringing both Middle and High School grade levels together in one facility, a high priority project identified by stakeholders was the need for an auxiliary gym to accommodate athletic and other extracurricular activities for both the district and the community.

Why a Middle School Gym?

- 3 grade levels have been added to the building since 2013
- Practice Schedule Improvement - Students will no longer have to practice until late into the evening hours due to facilities overscheduling
- Dedicated Middle School facility and locker rooms
- Space for multiple PE classes to be held at once
- Room for additional extracurricular activities
- Space available for scheduling of community events

PRESENTED SCOPE

The addition of a **Middle School gym** would allow for simultaneous practice and events for numerous athletic team sports. In addition to the Gym, other key project components onsite are:

- Middle School gym with dedicated locker rooms
- Exterior accessible storage for community track
- Partial roof replacement
- Safety enhancements
