## **Jefferson: Spring Into Learning: Growing Our Brainpower!**

Spring is an exciting time in our K-2 classrooms! This is when all the things we've been learning throughout the year start to come together, and we see just how much we've grown.

From reading new words to solving tricky math problems, students are building important skills every day. With just a few months left in the school year, this is the perfect time to keep working hard, asking questions, and showing what we know!

Every day is a chance to learn something new, and our teachers are here to help students do their best. By listening carefully, trying their hardest, and having fun with their learning, students can also make the most of the time we have left.

Let's keep growing our brains, supporting each other, and making this a fantastic end to the school year!

## **Amber Kowatch Curriculum Director**

Amber Kowatch has dedicated 18 years to education, building a diverse and impactful career.

She began as a classroom teacher, spending six years shaping young minds before transitioning into the role of an Instructional Technology Coach for two years. She then stepped into leadership as a Principal, serving for four years.

Now in her sixth year as a Curriculum Director, Amber continues to drive innovation and excellence in education.

Bachelor's of Science  
Master's of Curriculum and  
Instruction from Lake Superior State  
University
