

May 5, 2026

Dear Parent or Guardian:

The Manistee Public School's Integrated Pest Management contractor EnviroSafe, Inc. and our staff have been working to eliminate a pest concern at your child's school (bedbugs)

Given the nature and location of this pest they felt it was warranted to apply a pesticide to try to resolve this concern. A controlled pesticide application, using a product approved by the EPA, will be applied. The application will be done by technicians who are State Licensed and trained in the use of pesticides. The treatment is described below:

School: Manistee Middle/High School

Date of application: May 8

Time of Application: After school

Area treated: 202,204,205,206,locker bay 570

Description of treatment: Cimexa insecticide dust applied to cracks and crevices

If you have any questions or concerns please feel free to contact the District's Operation Office at 231-723-3521. If you would like more information on pesticides you may call the National Pesticide Information Center at (800) 858-7378 or the Michigan Department of Agriculture and Rural Development (800) 292-3939. Information may also be found on the web at www.npic.orst.edu

Sincerely,

Howard Vaas
